

ITI & Capgemini ServiceNow Assessment

February - June 2026

OVERVIEW

In this ServiceNow assessment, you will configure a complete ITSM environment to facilitate Lina Hassan's onboarding at Capgemini. From building service catalogs and automated onboarding workflows to managing incidents, security patches, and change requests, you will demonstrate end-to-end platform proficiency. This project tracks Lina's journey, ensuring all IT services—from onboarding to troubleshooting and infrastructure maintenance—are fully functional, automated, and documented.

Part 1: Orientation & Navigation

This section serves as your initial orientation to the ServiceNow Personal Developer Instance (PDI)

Step 1: All 4 modules opened via App Navigator

- Path: Search in app navigator → Service Desk → Incidents

The screenshot shows the ServiceNow interface with the 'Incidents' list view. The left sidebar (App Navigator) is open, showing the 'Service Desk' module selected. The main content area displays a table of incidents. The table has the following columns: Number, Opened, Short description, Caller, Priority, State, Category, Assignment group, Assigned to, and Update. The table contains 10 rows of incident data.

Number	Opened	Short description	Caller	Priority	State	Category	Assignment group	Assigned to	Update
INC0009009	2018-08-30 01:06:16	Unable to access the shared folder.	David Miller	4 - Low	New	Inquiry / Help	(empty)	(empty)	2018-1: 23:30:2
INC0009005	2018-08-31 21:35:21	Email server is down.	David Miller	1 - Critical	New	Software	(empty)	(empty)	2018-1: 23:18:5
INC0009001	2018-09-11 20:56:26	Unable to post content on a Wiki page	David Miller	3 - Moderate	New	Inquiry / Help	(empty)	(empty)	2018-1: 23:32:4
INC0008112	2019-07-29 11:48:43	Assessment : ATF Assessor	survey user	5 - Planning	New	Inquiry / Help	(empty)	(empty)	2019-0 11:49:2
INC0008111	2019-07-22 14:04:57	ATF : Test1	System Administrator	5 - Planning	New	Inquiry / Help	(empty)	(empty)	2019-0 14:05:4
INC0008001	2021-01-15 13:04:14	ATF:TEST2	survey user	5 - Planning	New	Inquiry / Help	(empty)	(empty)	2021-0 15:31:4
INC0007002	2018-10-16 22:47:51	Need access to the common drive.	David Miller	4 - Low	New	Inquiry / Help	(empty)	(empty)	2018-1: 23:28:4
INC0007001	2018-10-16 22:47:10	Employee payroll application server is down.	David Miller	1 - Critical	New	Hardware	Openspace	(empty)	2025-1: 18:11:3

Part 2: Forms & List Layout

This section focuses on tailoring the user interface to meet business requirements by modifying the Incident form fields and list views.

Step 1 & 2: All 4 new fields added to form Default view

Form design

The screenshot shows the ServiceNow Form Design interface for the Incident form. The top bar indicates the form is for 'Incident [Incident]' and is in 'Default view'. The main area is titled 'Form Design' and shows a list of fields arranged in two columns. The fields are: Number, Caller, Service offering, Configuration item, Universal Request, Transfer reason, State, On hold reason, Impact, Urgency, Priority, Assignment group, and Assigned to. Each field has a gear icon for configuration. Below the main field list, there is a section for 'Added Fields' which includes Category, Subcategory, Service, and Channel. A sidebar on the left lists various field types like Active, Activity due, Actual end, Actual start, Additional assignee list, Approval, Approval history, Approval set, Business Service, Business duration, and Business Impact.

Default view

The screenshot shows the ServiceNow Incident form in the Default view. The top bar includes the ServiceNow logo, navigation tabs (Favorites, History, Workspaces, Admin), and the incident title 'Incident - Create INC0010032'. The form is divided into two main sections. The top section contains fields for Number (INC0010032), State (New), Impact (3 - Low), Urgency (3 - Low), Priority (5 - Planning), Assignment group, and Assigned to. The bottom section, titled 'Added Fields', contains fields for Category (Inquiry / Help), Subcategory (-- None --), Service, and Channel (-- None --). The form has 'Submit' and 'Resolve' buttons at the bottom.

Step 3: Resolution Details' section with 4 correct fields

Form design

The screenshot shows the ServiceNow Form Design interface for an Incident form. The left sidebar lists various fields available for selection, including Active, Activity due, Actual end, Actual start, Additional assignee list, Approval, Approval history, Approval set, Business Service, Business duration, Business impact, Business resolve time, Child Incidents, Closed, Closed by, and Comments and Work notes. The main area displays the form layout with several sections:

- Configuration item**: Includes fields for Configuration item, Universal Request, Transfer reason, Urgency, Priority, Assignment group, and Assigned to.
- Added Fields**: Includes fields for Category, Subcategory, Service, and Channel.
- Description**: Includes fields for Short description, Description, and Contextual Search Results (Formatter).
- Resolution Details**: Includes fields for Resolution code, Resolution notes, Resolved by, and Resolved.

Default view

The screenshot shows the ServiceNow Incident form in the default view. The left sidebar lists various navigation options, including Self-Service, Business Applications, Dashboards, Service Catalog, Employee Center, Knowledge, Visual Task Boards, Incidents, Watched Incidents, My Requests, Requested Items, Watched Requested Items, My Connected Apps, My Profile, and My Tagged Documents. The main area displays the form layout with the following fields:

- Number**: INC0010033
- State**: Resolved
- Impact**: 3 - Low
- Urgency**: 3 - Low
- Priority**: 5 - Planning
- Assignment group**: [Search]
- Assigned to**: [Search]
- Resolution Details**: Includes fields for Resolution code (-- None --), Resolution notes, Resolved by, and Resolved.

Step 4: Both mandatory fields configured (asterisk visible)

The screenshot displays the ServiceNow 'Incident - Create INC0010008' form. The left sidebar contains navigation links such as 'Self-Service', 'Business Applications', 'Dashboards', 'Service Catalog', 'Employee Center', 'Knowledge', 'Visual Task Boards', 'Incidents', 'Watched Incidents', 'My Requests', 'Requested Items', 'Watched Requested Items', 'My Connected Apps', 'My Profile', 'My Tagged Documents', 'My Tags', 'My Knowledge Articles', 'Take Survey', 'My Approvals', and 'My Assessments & Surveys'. The main form area includes fields for 'Number' (INC0010008), 'State' (New), 'Impact' (3 - Low), 'Urgency' (3 - Low), 'Priority' (5 - Planning), 'Assignment group', and 'Assigned to'. Mandatory fields are indicated by a red asterisk: 'Caller' and 'Short description'. The 'Description' field is also present. At the bottom, there is a 'Related Search' section with a search bar and a 'Knowledge & Catalog (All)' dropdown. A message at the bottom center states 'No results to display', and a Windows activation notice is visible in the bottom right corner.

Step 5 & 6: List view with 8 correct columns

The screenshot shows the ServiceNow Incidents list view. The 'Personalize List Columns' dialog box is open, allowing users to select columns for the list view. The 'Available' list includes Subcategory, Tags, Task type, Time worked, Transfer reason, Universal Request, Updates, Upon approval, Upon reject, Urgency, User input, Watch list, Work notes, Work notes list, and Opened. The 'Selected' list includes Number, Priority, Caller, Category, Assignment group, Assigned to, State, and Updated. The dialog also has checkboxes for 'Wrap column text', 'Compact rows', 'Active row highlighting', 'Modern cell coloring', 'Enable list edit', and 'Double click to edit'. The 'Reset to column defaults' button is at the bottom left, and 'Cancel' and 'OK' buttons are at the bottom right.

Part 3: Business Rules (Server-Side Scripting)

This section covers the implementation of server-side Business Rules to automate incident priority calculations based on impact and urgency. By automating this process, you ensure consistent service level management and reduce the potential for manual data entry errors.

Steps 1 to 4 are update-set

Step 5 & 6: Auto-Set Priority = Critical and Assignment Group = Service Desk

Confirmed when impact and urgency is high then service desk auto assigned and priority is critical

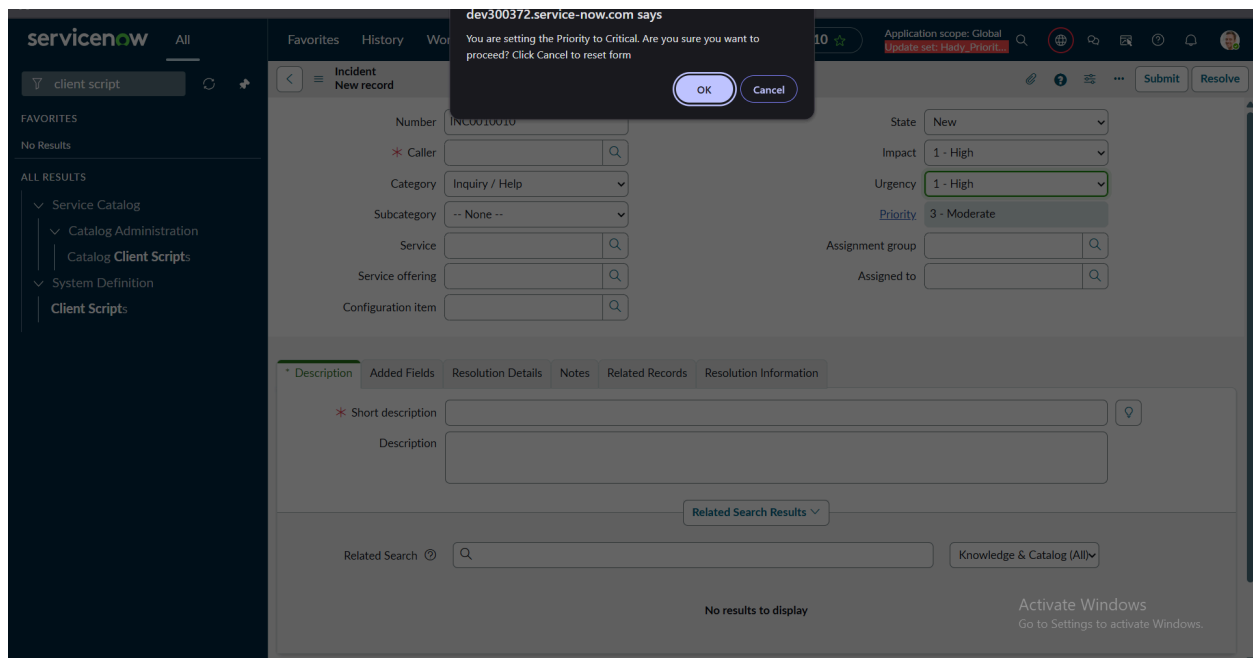

The screenshot displays the ServiceNow interface for an Incident record (INC0010009). The left sidebar shows the navigation menu with categories like Business Unit Strategy, Business Applications, Business Capabilities, CSDM, Design, Business Process, Business Capability, Business Application, Sell and Consume, Business Service Portfolio, Business Service Offering, Business Service, Business Request Catalog, Metrics, Business Rules, System Definition, Business Rules, System Diagnostics, Session Debug, Debug Business Rule, and Debug Business Rule (Details). The main form area shows the Incident details with fields for Number (INC0010009), State (New), Caller (Abel Tuter), Category (Inquiry / Help), Subcategory (-- None --), Service, Service offering, Configuration item, Impact (1 - High), Urgency (1 - High), Priority (1 - Critical), Assignment group (Service Desk), and Assigned to. The form also includes tabs for Description, Added Fields, Resolution Details, Notes, Related Records, and Resolution Information. The Short description field contains the text 'Auto-Set Priority = Critical and Assignment Group = Service Desk.' The bottom of the form shows related links like Show SLA Timeline and Repair SLAs, and a task SLAs (2) section.

Part 4: Client Scripts (Client-Side Scripting)

This section covers the creation of a Client Script designed to trigger a warning dialog for high-priority incidents. By providing immediate feedback to users during form submission, you enhance data integrity and ensure proper handling of urgent requests before they are saved to the system.

Steps 1 to 4 are update-set

Step 5 & 6: When I set Impact and Urgency to 'High,' the business rule automatically updated the Priority to '1' (Critical), which then triggered the confirmation dialog from my client script.

After clicking cancel in the dialog

Part 5: UI Policies

This section focuses on using UI Policies to dynamically control field visibility based on the incident state. By showing resolution-specific fields only when an incident is being closed, you reduce clutter and improve the user experience for support agents.

Steps 1 to 5 are update-set

Step 6: Before setting state to resolved or close

The screenshot shows the ServiceNow Incident form for incident INC0010017. The 'Resolution Details' tab is active, displaying fields for 'Resolved by' and 'Resolved at'. The 'State' is set to 'New'. The 'Priority' is '5 - Planning'. The 'Assignment group' is empty. The 'Resolution Details' tab is highlighted in the top navigation bar. The 'Resolution Details' tab is active, showing fields for 'Resolved by' and 'Resolved at'. The 'State' is set to 'New'. The 'Priority' is '5 - Planning'. The 'Assignment group' is empty. The 'Resolution Details' tab is highlighted in the top navigation bar.

After setting state to Resolved

The screenshot shows the ServiceNow Incident form for incident INC0010017 after the state has been set to 'Resolved'. The 'Resolution Details' tab is active, displaying fields for 'Resolution code', 'Resolution notes', 'Resolved by', and 'Resolved at'. The 'State' is now 'Resolved'. The 'Priority' is '5 - Planning'. The 'Assignment group' is highlighted with a green border. The 'Resolution Details' tab is highlighted in the top navigation bar.

Part 7: Flow Designer / Process Automation

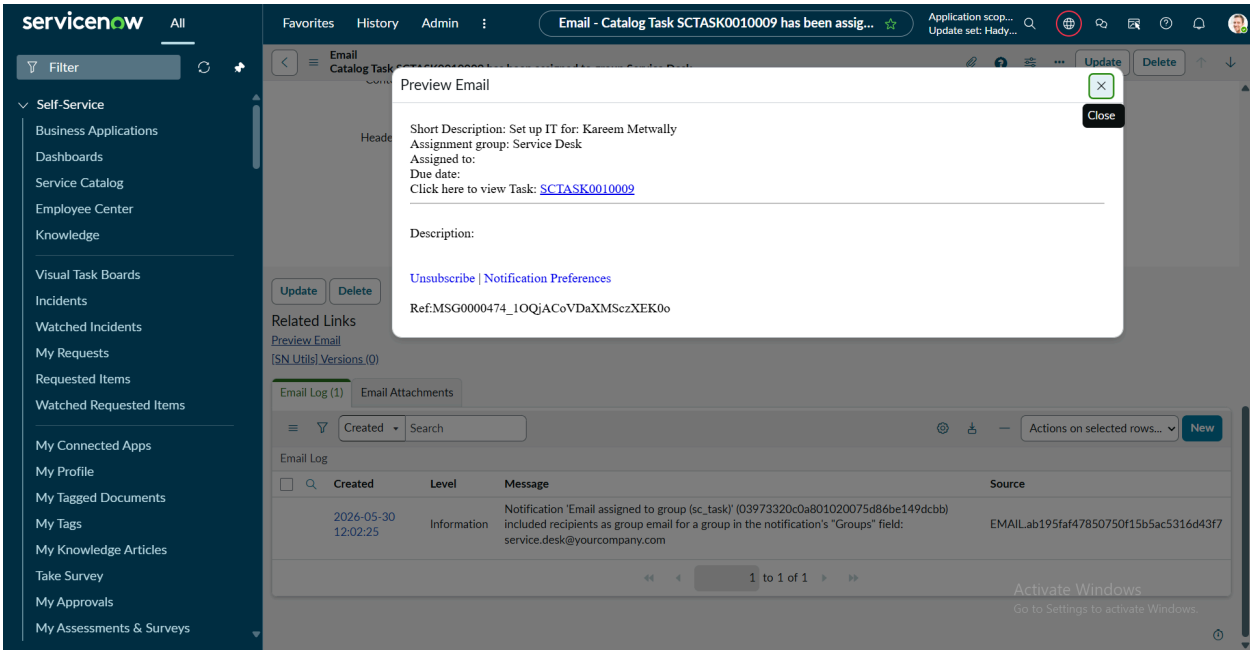

This section covers the development of an automated onboarding process using Flow Designer to orchestrate tasks and notifications. By defining triggers and actions, you create a seamless, end-to-end workflow that ensures all onboarding requirements are fulfilled efficiently without manual intervention.

Steps 1 to 5 are update-set

Step 6: Create a new request

The screenshot displays the ServiceNow user interface for a request form titled "Hady_NewEmployeeOnboarding". The breadcrumb navigation shows the path: Home > Service Catalog > HR Services > Hady_NewEmployeeOnboarding. A search bar labeled "Search Catalog" is located in the top right. The form itself contains several fields: "Employee Full Name" with the value "Kareem Metwally", "Start Date" with the value "2026-06-03", and "Department" with a dropdown menu currently showing "IT". Below these is a section titled "Equipment Needed" with a sub-header "Options" and four checkboxes: "Laptop" (checked), "Mobile Phone" (checked), "Headset" (checked), and "Access Badge" (unchecked). At the bottom of the form is an "Additional Notes" text area. To the right of the form is a prominent blue "Request" button. The top navigation bar includes links for Knowledge, Catalog, Requests, System Status, Cart, Tours, and a user profile for "System Administrator". In the bottom right corner, there is a Windows watermark that says "Activate Windows" and a chat icon.

The screenshot displays the ServiceNow user interface. On the left is a dark blue sidebar with the 'servicenow' logo and a navigation menu under 'Self-Service' including Business Applications, Dashboards, Service Catalog, Employee Center, Knowledge, Visual Task Boards, Incidents, Watched Incidents, My Requests, Requested Items, Watched Requested Items, My Connected Apps, My Profile, My Tagged Documents, My Tags, My Knowledge Articles, Take Survey, My Approvals, and My Assessments & Surveys. The main header area shows 'Email - New Onboarding Request - Action Required' with a star icon, and a search bar with 'Application scop...' and 'Update set: Hady...'. Below the header, a 'Preview Email' modal window is open. The modal has a title bar with a close button and a 'Close' button. The email content is as follows:

New Onboarding Request

Hello Team,

A new onboarding request has been submitted. Please find the details below:

Employee Name: [Kareem Metwally]

Start Date: [2026-06-03]

Thank you,
ServiceNow Automation

Capgemini Internal Notification

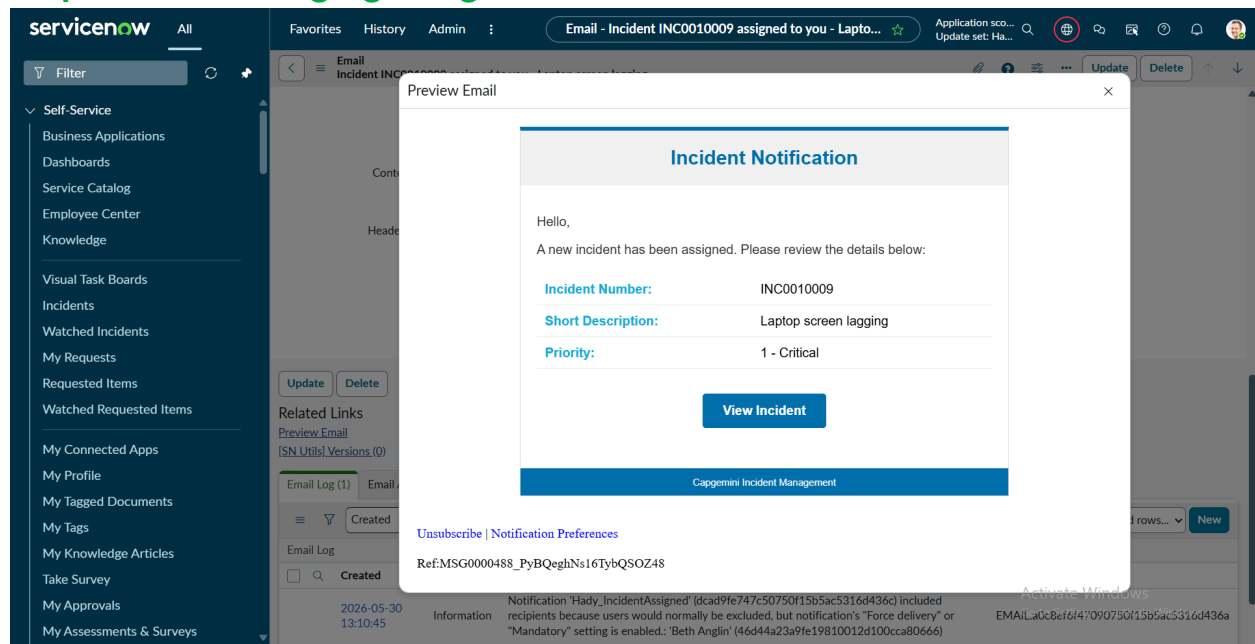

Below the modal, there is an 'Email Log' table with columns: Created, Level, Message, and Source. The table is currently empty. At the bottom right, there is a 'New' button and a 'Windows' activation watermark that says 'Activate Windows Go to Settings to activate Windows.'

Part 8: Email Notifications

This section explains the configuration of email notifications triggered by incident assignments. By setting up these automated alerts, you ensure that the assigned technician is promptly notified of their new task, fostering faster response times and improved communication within the IT team.

Steps 1 to 5 are update-set

Step 6: After changing assign-to field this email will be sent

Part 9: Service Portal

This section involves configuring the Service Portal home page to provide a streamlined, user-centric interface for navigating IT services. By customizing the layout and widgets, you ensure that employees can easily access essential resources and request services, significantly improving the overall end-user experience.

Part 10: ITSM - Incident Management

This section details the hands-on process of managing an end-user incident, specifically handling a report regarding a malfunctioning laptop keyboard. You will walk through the full incident lifecycle—from initial intake and categorization to resolution—ensuring the ticket is accurately documented and properly closed.

Step 1: Incident created with all 6 correct field values

The screenshot displays the ServiceNow Incident Management interface for a new incident. The left sidebar shows the navigation menu with options like Self-Service, Business Applications, Dashboards, Service Catalog, Employee Center, Knowledge, Visual Task Boards, Incidents, Watched Incidents, My Requests, Requested Items, Watched Requested Items, My Connected Apps, My Profile, My Tagged Documents, My Tags, My Knowledge Articles, Take Survey, My Approvals, and My Assessments & Surveys. The main area shows the incident details for 'Incident - INC0010024'. The incident is in the 'New' state, with an impact of '2 - Medium', urgency of '2 - Medium', and priority of '3 - Moderate'. The caller is 'Abel Tuter', and the category is 'Hardware' with subcategory 'Equipment'. The short description is 'Laptop delivered without keyboard on first day'. The interface includes tabs for Description, Added Fields, Resolution Details, Notes, Related Records, and Resolution Information. There are buttons for Update, Resolve, and Delete. A 'Related Search Results' button is also present. The bottom of the screen shows 'Related Links' for Show SLA Timeline and Repair SLAs, and a status bar with 'Task SLAs (1)', 'Affected CIs', 'Impacted Services/CIs', and 'Child Incidents'.

Part 11: ITSM - Service Request Fulfillment

This section outlines the end-to-end fulfillment process for the IT onboarding service request. You will walk through the lifecycle of a Request Item (RITM), managing associated catalog tasks to ensure proper resource provisioning and completion according to established business workflows.

Step 1 & 2: Request submitted via Service Portal with correct variable values

The screenshot displays the ServiceNow interface for a Request Item (RITM) titled "Request IT setup for a new employee joining your team." The page is viewed by a System Administrator. The RITM details include:

- Number:** RITM0010007
- Created:** just now
- Updated:** just now
- State:** Open

The request description is "Request IT setup for a new employee joining your team." The item is "Hady_NewEmployeeOnb..." and was requested for by the "System Administrator".

The "Additional Details" tab is active, showing the following information:

- Employee Full Name:** Lina hassan
- Start Date:** 2026-06-01
- Department:** Finance
- Laptop:** true
- Mobile Phone:** false
- Headset:** false
- Access Badge:** true

The bottom of the screen shows a Windows "Activate Windows" watermark and a ServiceNow chat icon.

Part 12: ITSM - Change Management

This section details the submission of a Normal Change Request specifically for a firmware security patch. You will walk through the process of defining the change scope, setting appropriate risk and impact levels, and initiating the necessary approval workflow to ensure the patch is authorized and scheduled correctly.

Step 1 & 2: Change created: Type = Normal, all required fields correct

The screenshot shows the ServiceNow interface for creating a Change Request. The left sidebar contains a navigation menu with categories like Assessments, Survey, System Definition, System Mailboxes, System Security, Users and Groups, Reports, Identity and Access Audit, and User Administration. The main area displays the 'Change Request - Create CHG0030001' form. The form has a top navigation bar with tabs: New, Assess, Authorize, Scheduled, Implement, Review, Closed, and Canceled. The 'New' tab is active. The form fields are organized into two columns. The left column includes fields for Number (CHG0030001), Requested by (System Administrator), Category (Hardware), Service, Service offering, Configuration item, Priority (4 - Low), Risk (Low), Impact (3 - Low), Short description (Deploy firmware security patch KB2026-06 to all new-hire laptops), Description, and On hold reason. The right column includes fields for Model (Normal), Type (Normal), State (New), On hold (checkbox), Conflict status (Not Run), Conflict last run, Assignment group (Service Desk), and Assigned to. At the bottom, there are tabs for Planning, Schedule, Conflicts, Notes, and Closure Information. The 'Planning' tab is active, showing fields for Justification and Implementation plan. An 'Activate Windows' watermark is visible in the bottom right corner.

Part 13: Reporting & Dashboards

This section focuses on the development of a centralized Incident Priority Dashboard to provide real-time visibility into operational performance. By configuring custom gauges and report widgets, you enable stakeholders to quickly assess incident trends, identify bottlenecks, and make data-driven decisions regarding service desk prioritization.
